

DTS2 Digital Language Training System

DTS2-- Digital Language Training System, a professional language training system including practical function such as **MP3 audio/ text broadcasting, dictation, student demonstration, simultaneous interpretation, oral/paper exam, group discussion, live recording**, etc that facilitates teaching and learning efficiency. Non-PC based structure let learners easily master the target language by the students unit which embedded system and 32 bit DSP processor.

Powerful study function have the students access the opened materials such as reading, listing practices and even the live recording of self oral repeat.

Structure

Features

- **Efficient and Easy Teaching Way**
 - With clear and simple software interface teachers easily instruct the target language by multiple useful function such as **AUDIO / TEXT broadcasting** to part or all, dictation, **student demonstration, simultaneous interpretation, oral/paper exam, group discussion, text shadowing, live recording** and so on.
- **Enjoyable Learning-Powerful self study function**
 - Without PC, students can reach the target language learning by single students unit such as **AOD (audio on demand), VSCP (Variable Speed Constant Pitch), self exam, SP function, oral recording, A/B repeat, essay reading**. Especially the **USB downloading**, let students download all open files to do home preview/review.
- **Complete oral/paper exam mode**
 - **Randomly quiz** under teacher mode to realize students' learning condition.
 - **A/B papers** choice to avoid neighboring students' cheating.
 - **Single/Group oral exam Combining keyboard** to achieve composition training.

Function

Function	Details
Teaching	Flexibly instruct students by dialogue, demonstration, monitor, dictation, group discussion etc. for vivid and interactive teaching.
Student demonstration	Appoint maximum 4 students to demonstrate through audio communication.
Dialogue	Dialogue with one selected student and other students will not hear the conversation.
Monitor	Listen to conversation between students without interrupting the dialogue.
Simultaneous Interpretation	Assign maximum 4 students to interpret certain audio file and other listeners can freely choose one to listen. Original audio and interpreter's sound can be heard separately.
Dictation	Play certain audio file and allow student to key-in what to be heard. The answer will be saved to teacher PC for record.
Multi-Channel	Broadcast maximum 8 audio files that teacher can assigned certain one to selected students or allow students to choose freely.
Group	Teacher can appoint 2 or 4 students as a group to discuss.
Examination	Paperless reading / writing / listening / speaking exams with answer analyzer which can analyze student answer and save the result to teacher PC.
Quiz	Online quiz for multiple choices to understand students' learning conditions.
Oral test	Record oral test by individual or group and save the audio files to teacher PC.
Self study	Allow student freely access teaching material such as audio or text files from teacher PC to do online practicing. Furthermore, built-in HD recorder help students' learning and the recorded file will be saved to teacher PC automatically.
IP Phone	Online call between 2 students for oral practice.
A-B Repeat	Set certain segment of audio file to listen repeatedly when students are practicing under self-study mode.
SP Function	Sentence/Pause for student to listen and practice simultaneously. Support SP/ SSP/SPSP modes.
VSCP (Variable Speed with Constant Pitch)	Able to change audio speed to be faster or slower with the same tone. Student can practice according to learning digestion.
E board	Send text message to all or appointed students.
Live recording	Live record the whole teacher course into digital file and save in teacher PC.

Component

Product	Model No.	Description
Audio Master	DTS2-308	Audio mater for teacher to control all the functions.
Cassette Recorder	DTS2-R01	Digital cassette for teacher to control the recording
Student Unit	DTS2-101	For student to receive and self-study
Headset	TH-952	Professional language earphone and microphone
