

MPS Meeting Presentation System

(VGA+Audio+MIC Broadcasting)

Different from traditional conference presentation system, latest MPS can reach video and audio synchronic broadcasting or projection. By the super model MPS, participants can project laptop/PC video and audio or broadcast it to other participant's monitors. Furthermore, all participants can talk to others by microphone. Thus more efficient and interactive conference presentation will be easily obtained.

Features

- With MPS, participants can do video presentation and oral report freely just bringing their laptops.
- User-friendly touch button design simplifies the operation and enhances efficiency in the meeting.
- Master and slaves can open the microphone and start the discussion by pressing talking button.
- Master and slaves can broadcast Video and Audio signals of laptop/PC simultaneously to projector and monitors simultaneously by pressing projection button.
- Master can transmit signal to display device in 300m with CAT5E cable.
- Support resolution: XGA, SXGA, UXGA, WXGA, WSXGA/WXGA+.
- High-quality video signal promised by using STP-CAT5E Cable transmission.

Structure

Specification

MPS-308B Master	MPS-108B Slave
MIC Input: High sensitivity of gooseneck microphone.	
VGA Input: Build-in VGA cable connect to NB or PC.	
VGA Output: Connect to monitors displaying the broadcasted video signal.	
Audio Input: Connect to audio input of NB, PC, etc.	
Audio Output: Connect to amplifier or speaker.	
Power: Adapter DC 12/1A	
RS-232 port: Prepared port to future firmware update	
RJ-45 port: Connect to MPS-108B(Slave side) with CAT5 Cable	
Light touch button(four-functions)	Light touch button(two-functions)
AV Extender output: Connect to remote projector, amplifier, etc.	

Functions

Master projection button: Master broadcast his VGA signal from NB/PC to projector or all monitors of slaves.

Slave projection button: Slave broadcast his VGA signal from NB/PC to projector or all monitors of master and slaves.
